# SEADIVE®

Exclusive benefits of SEADIVE vision-enhancement lenses

Eagleeye-SLX

## RAYBLOCKER-HD

*"Best overall for any and all diving/snorkeling conditions"*

- Almost 100% light passage defines objects at all depths
- Reduces harmful UV/glare
- Reduced surface grit in eyes
- Overall greater clarity
- Quick vision-return from surface
- Great for instructors
- Fog-Free except frameless masks

## TRUECOLOR-HD

- Almost 100% light passage defines objects at all depths
- Reduces harmful UV/glare
- Retention of yellow-rose past 10 to 25 feet
- Yellow "pops" less clear water
- Rose deepens coral colors
- Fog-Free except frameless masks

## HYDROPHOBIC SOFTLIGHT-HD

- Greater light defines objects at all depths
- Reduces harmful UV/Glare
- Yellow softens eye strain
- Eye visibility for instructors
- Hydrophobic water repellant
- Water beads off quickly
- Fog-Free

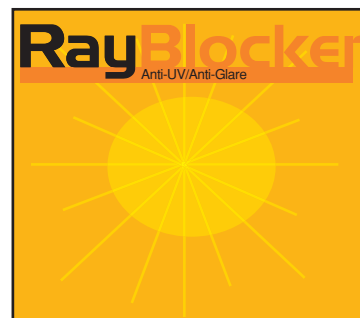

For the past six plus years Seadive/Oceanways has developed and field-tested, anti-reflective (ARC) mask coatings of tempered glass. Seadive/Oceanways' ARC coatings now allow almost 100% transmission of light. Standard tempered glass has a minimum of 4%-plus rate of reflection which can seriously distort underwater vision. Only Seadive/Oceanways has licensed application and laboratory fabrication. Only Seadive/Oceanways has six-plus years of dealer/customer satisfaction. Only Seadive/Oceanways offers RayBlocker, TrueColor-HD and Hydrophobic Fog-Free Lenses.

# SEADIVE **Frameless** single-piece construction Mask

- Low Volume
- Proven longer lasting
- Contours to the face with buckle assembly attached to skirt
- Fits snugly in BCD pocket
- Increased vision
- 1st quality silicone

## **New Easy-Adjust Buckle**

is attached directly to mask skirt. Strap adjustment pulls the mask skirting around and over facial contours instead of forcing a solid rigid frame backward. Holds better, feels better, seals better, snug without the bandstrap pressurized effect on back of head.

SEADIVE®

# Tomorrow's Masks Today

## Anti-Reflective

Coatings allow maximum transmission of light for clearer, more comfortable underwater viewing.

## Laboratory Fabricated

By a professional optical lab to meet exacting specialized requirements for each lens.

RayBlocker-HD

TrueColor-HD

Hydrophobic SoftLight-HD

## Anti-UV, Anti-Glare

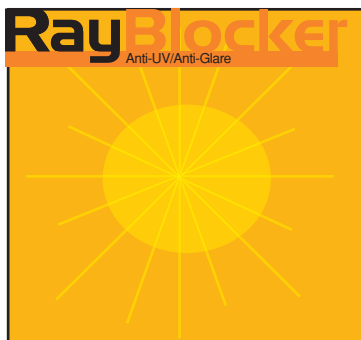

Reduces harmful UV rays, eliminates refractive light glare.

## High-Definition

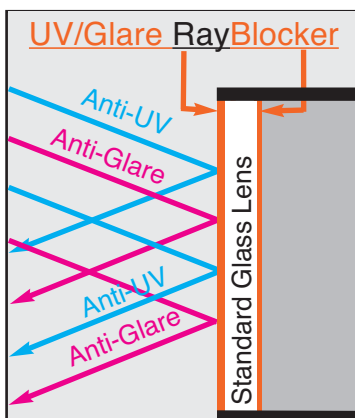

Refines light entering lens for brighter, sharper image regardless of depth or water conditions.

## 6-Year Field Tested

Proven value in five years open-water testing usage worldwide.

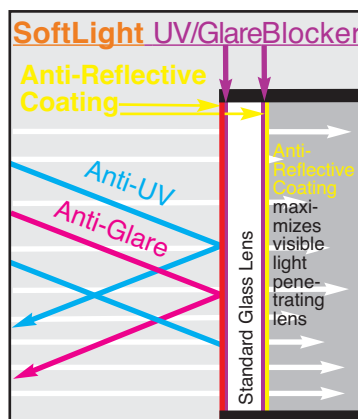

**RayBlocker-HD** "High Definition" lenses minimize harmful UV and glare. Reduce light-wave length to 400-600 nanometers—less harsh white light—Blue tint for comfortable human-eye viewing—improved definition at all depths.

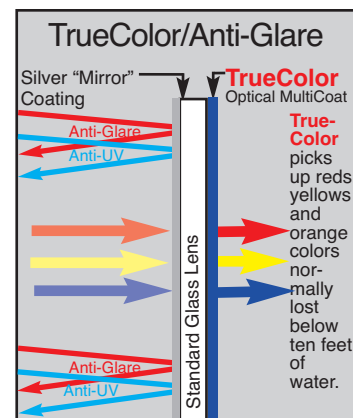

## SoftLight with new Hydrophobic Fog-Free/HD NanoTech Coating

**SoftLight UV-GlareBlocker -HD Lenses**

**SoftLight UV-GlareBlocker High Definition Lenses** with Anti-Reflective Coating maximize visible light for clear, comfortable view. High Definition imaging from refining light and eliminating glare. Reduces harmful UV rays and glare.

**TrueColor** lenses pick up colors normally lost underwater at depths as little as ten feet of water. Also reduce glare, block UV rays, define faint edges, and increase depth perception.

Don't miss the new and exciting **SEADIVE** exclusive **Hydrophobic Fog-Free/HD Lenses**. New NanoTech Coating levels out even the tiniest surface imperfection. Minimizes light refraction for amazing high definition clarity. Leaves the glass surface so slick even the smallest water vapor droplets have no place to attach.
